

Tunable Monochromatic Light Source

The Tunable Light Source (TLS) are pre-aligned, pre-assembled illumination systems capable of outputting monochromatic light from 200nm. This is a complete plug and play system and includes TLS-C1 Software.

TLS is composed of Zolix light source and spectrometer. It is very convenient for the users who want the flexibility of a modular design and the simplicity of an integrated system.

Features

- High stability, high repeatability, high resolution;
- Low stray light; ■ Preserve chopper holder;

TLS Selections

- The bandwidth value is got when the wavelength is 435.8nm
- The bandwidth is adjusted manually
- All of the models in the tables contain gratings, when instead of -G with -N, then the gratings isn't contained, other gratings are optional.

Accessories

- Uniform Light Uniformity >98%
- Collimated Light Divergence Angle (half angle) <math><0.3^\circ</math>
- Convergent Light Beam Size <math><1\text{mm}</math>
- Fiber Coupling

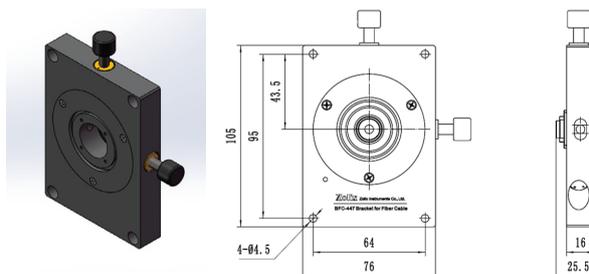

Light Sources

Fiber Adapters

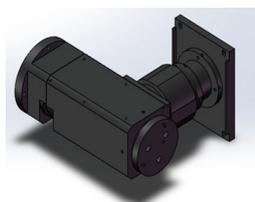

BFC series fiber adapter can be compatible with the range of Zolix monochromators and spectrographs or sample chamber.

BFC-447

Adjustable(XY) fiber adapter, for 10mm, 13mm diameter fiber optic bundle, SMA905 Termination fiber.

Collimated Light Adapter

Model	Mirror Coating	Spectral range	Divergence half-angle	Optical Beam size	
TLS-A5	Al	Full wave band	<math><0.3^\circ</math>	3-25mm	No mount for filter wheel
TLS-A6	Au	IR	<math><0.3^\circ</math>	3-25mm	
TLS-A7	Al	Full wave band	<math><0.3^\circ</math>	3-25mm	Must be used with filter wheel together
TLS-A8	Au	IR	<math><0.3^\circ</math>	3-25mm	

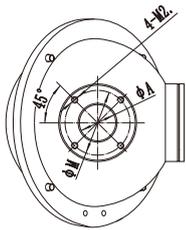

Applications

- PEC Photochemistry Measurement System
- Surface Photovoltage Test
- Transmission/Absorption /Reflection Measurement System
- Detector Spectral Responsivity Measurement System
- Solar Cell Quantum Efficiency Measurement System
- Optical Lens Spectral Transmittance Measurement System
- The fluorescence Spectrum Measurement (as excitation light)
- Eye Protection Products Measurement System

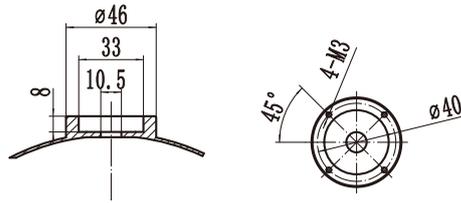

Uniform Light Accessory - Integration Sphere

Various size integration spheres feature high reflectivity rate and high uniformity that make them meet different application requirement. The below model is standard integration sphere, the optional upgrade is the gold coat integration spheres which add -IR on the end of the standard model.

Model	Diameter (mm)	Optical axis height(mm)	Installation Hole M(mm)	Optical Axis Height(mm)	Uniformity
IS-050-14T	50	14	25	—	>98%
IS-100-25	100	25	50	145-200	>98%
IS-150-38	150	38	65	155-200	>98%
IS-200-50	200	50	80	159-210	>98%
